

Diversify offshore with Glacier Invest Global Solutions

The Glacier Invest team recently announced the launch of Glacier Invest Global Solutions. These solutions offer diversified offshore portfolios that maximise long-term risk-adjusted returns through the meticulous blending of high-quality managers.

The Glacier Invest Global Solutions

Financial intermediaries can select between two ranges of global managed portfolios – the Global Optimised Portfolio range, based on a multi-asset approach, and the Global Specialist Portfolio range, based on a specialist building-block approach (subject to requirements).

The Global Optimised Portfolios will appeal both to investors new to offshore investing as well as seasoned offshore investors. The portfolios are constructed in accordance with specific risk profiles and investment objectives, and each consists of a range of funds with optimised weightings in the portfolio.

The Global Specialist Portfolios are specialist risk-profiled global portfolios based on a building-block approach to portfolio construction. They are diversified across asset classes using a robustly tested asset allocation framework and various investment styles and factors.

The Glacier Invest Global Solutions offer diversified offshore portfolios that maximise long-term risk-adjusted returns through the meticulous blending of high-quality managers.
